

RESOURCE INFORMATION GUIDE

RESOURCE INFORMATION GUIDE

SEXUAL MINORITY

2006
DRAFT

*Department of Social & Health Services
Mental Health Division
Sexual Minority Subcommittee Project
PO Box 45320
Olympia, Washington 98504-5320
(360) 902-8070
July 2003*

The Sexual Minority Resource Guide is a project of the Sexual Minority Subcommittee (SMS) and the Mental Health Division (MHD). The guide is a document in its third draft edition. We are attempting to develop this resource guide and distributing it statewide to facilitate case transfers between geographical areas for those clients who are moving, who are being discharged from community or state hospitals, or who are beginning to come out and are having difficulty finding local community based resources. Many of the resources will be appropriate for transgender clients as well. It is intended for use by mental health clinicians, hospital liaisons and discharge planners as well as community providers to meet the needs of this population. Clients may have access to this guide as well.

We are hoping to increase the number of agencies who are willing to support, appreciate and nurture (per the Riddle Scale) this population. We are attempting to create a statewide network of specific providers who can be safely used as resources or facilitators. To this end, we are asking mental health agencies to designate a contact person to be included in the next update of this guide. This person would help initiate appropriate services within their organization with clinicians who have advanced skills/experience working with the Gay, Lesbian, Bisexual (GLB) community, and be able to provide referrals to local community resources.

Each provider currently listed responded to a request from the MHD to identify if they provide services to the sexual minority community. Inclusion of individuals, businesses, or agencies in this directory is not an endorsement by the Sexual Minority Subcommittee or the Mental Health Division. Please be advised that agencies are working towards quality assurance. If you have comments or concerns about service provision in your area, please use the tear off sheet to provide comments. If you have any questions please contact Mary Sarno at the MHD 1-800-446-0259.

Please use this sheet to make any needed changes or to designate the contact person for your agency. Please feel free to copy, distribute or use additional sheets as necessary.

Comments, suggestions, and feedback about service provision:

RIDDLE HOMOPHOBIA SCALE

In a clinical sense, homophobia is defined as an intense, irrational fear of same sex relationships that becomes overwhelming to the person. In common usage, homophobia is the fear of intimate relationships with persons of the same sex. Listed below are four (4) negative homophobic levels, and four (4) positive levels of attitudes taken toward lesbian and gay relationship/people. Dr. Dorothy Riddle, a psychologist, from Tucson, Arizona, developed them.

HOMOPHOBIA LEVELS OF ATTITUDE

1. Repulsion

- a) Homosexuality is seen as a “crime against nature.”
- b) Gays/lesbians are sick, crazy, immoral, sinful, wicked, etc.
- c) Anything is justified to change them: prison, hospitalization, negative behavior therapy, electroshock therapy etc.

2. Pity

- a) Heterosexual chauvinism.
- b) Heterosexuality is more mature and certainly to be preferred.
- c) Any possibility of “becoming straight” should be reinforced, and those who seem to be born “that way” should be pitied, “the poor dears.”

3. Tolerance

- a) Homosexuality is just a phase of adolescent development that many people go through and most people “grow out of.” Thus, lesbians/gays are less mature than “straight” and should be treated with the protectiveness and indulgence one use with a child.
- b) Lesbians/gays should not be given positions of authority because they are still working through their adolescent behavior.

4. Acceptance

- a) Still implies there is something to accept.
- b) Characterized by such statements as “You’re not lesbian to me; you’re a person,” or “What you do in bed is your own business,” or “That’s fine with me as long as you don’t flaunt it!

RIDDLE HOMOPHOBIA SCALE

POSITIVE LEVELS OF ATTITUDE

5. Support

The basic ACLU positions. Work to safeguard the rights of lesbians and gays. People at this level may be uncomfortable themselves, but they are aware of the homophobic climate and the irrational unfairness.

6. Admiration

Acknowledges that being lesbian/gay in our society takes strength. People at this level are willing to truly examine their homophobic attitudes, values and behaviors.

7. Appreciation

Values the diversity of people and sees lesbians/gays as a valid part of that diversity. These people are willing to combat homophobia in themselves and others.

8. Nurturance

Assumes that gay/lesbian people are indispensable in our society. They view lesbians/gays with genuine affection and delight, and are willing to be allies and advocates.
